

Conference on Econometric Analysis of Social Interactions

Friday October 1 and Saturday October 2

Andersen Hall, Room 3245

Friday October 1

10:00 - 10:15 opening remarks

10:15 - 11:00 Yann Bramoullé : “Do Peers Affect Student Achievement? Evidence from Canada Using Group Size Variation”

11:00 - 11:45 Aaron Sojourner: “Inference on Peer Effects with Missing Peer Data: Evidence from Project STAR”

11:45 - 1:15 Lunch

1:15 - 2:00 Ken Wolpin (with Petra Todd): “Aligning Learning Incentives to Improve Upper Secondary School Student Achievement in Mathematics in Mexico”

2:00 - 2:45 Chris Flinn: “Household Time Allocation and Modes of Behavior: A Theory of Sorts”

2:45 - 3:15 break

3:15 - 4:00 Guido Imbens: “An Empirical Model for Strategic Network Formation”

4:00 - 4:45 Aureo de Paula (with Elie Tamer): “Inference Approaches with Network Data”

Saturday October 2

9:00 - 9:45 Brian Krauth: “Peers as Treatments”

9:45 - 10:30 Natalia Lazzati: “Treatment Response with Social Interactions: Partial Identification via Monotone Comparative Statics”

10:30 - 11:00 break

11:00 - 11:45 Steven Durlauf (with Larry Blume): “Identification in Linear Social Interactions Models”

11:45 - 12:30 Chuck Manski: “The Capacity of Random Assignment to Identify Treatment Response with Social Interactions”
