| Microeconomic Theory | Wolinsky | ECON 412-1,2,3 Economic Theory and Methods ECON 414-1,2,3 Economics of Information ECON 415-1,2 Advanced Microeconomics | • Maximum of two sequences  
• Each sequence can be composed of any three courses selected from the ECON 412, 414, or 415 series.  
• Students may propose to substitute for one course per sequence a theory related course offered by another department. This requires advance approval by the theory field coordinator.  
• Generally, the allowable substitutions will be external courses with significant theory content (such as some of the PhD courses offered in the Kellogg School of Management) or courses with other relevant mathematical modeling content (such as some courses offered by the Department of Computer Science and in other engineering departments). However, pure math courses will ordinarily not count for this purpose, although students are strongly encouraged to take these courses in addition to their required sequences.  
• Exception: in one theory sequence, students may substitute one course with either COMP_SCI 496 Special Topics in Computer Science: Mechanism Design or COMP_SCI 497 Special Projects in Computer Science: Theory+X without the need for prior approval |
